

Home Internet Access on a BCPS Device

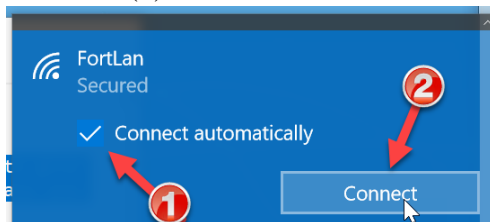

1. Log into your computer with your BCPS credentials. You **MUST** have logged into the computer for the first time while on the BCPS Network.
2. Click on the Wireless icon in the system tray near the clock.

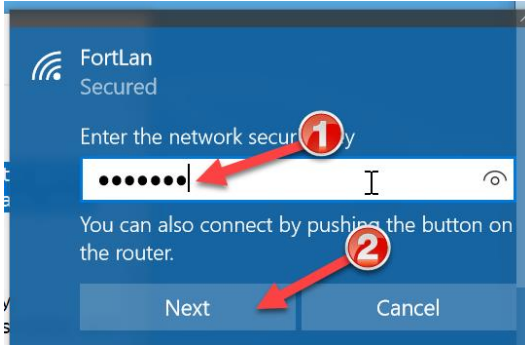

3. A list of available networks will appear. Click the name of the network in your home. You may need to contact your Internet Service Provider (ISP) if you do not know the name of your home network.

4. After clicking the name of the network select the **Connect automatically** check box (1) and then click **Connect** (2).

5. If prompted, enter your network password (1) and click **Next** (2). (If you do not know your network password you will need to contact your ISP for support.)

6. If prompted, click **NO** to allow your device to be discoverable.
7. That's it! You are connected to the Internet! You will notice the Wireless Icon now indicates the connection.
